Professional Summary

Infrastructure and observability engineer with 10+ years of enterprise IT operations experience across Splunk Enterprise, RHEL and Windows Server, virtualization, monitoring, production troubleshooting, security remediation and operational automation. Currently supports multiple government project teams through Splunk platform governance, log onboarding and lifecycle management, dashboards and reporting, ingestion and search troubleshooting, and Python/Bash automation. Brings strong enterprise infrastructure and logging foundations with a focused progression toward observability, platform reliability and site reliability engineering.

Core Skills

- **Observability & Logging:** Splunk Enterprise administration, log onboarding & retention, security logging use cases, log analysis & troubleshooting, dashboards & scheduled reporting
- **Infrastructure:** Red Hat Enterprise Linux (RHEL), Windows Server, Hyper-V, Nutanix, patching & vulnerability remediation, disaster recovery & system hardening
- **Automation & Data:** Python, Bash, operational automation, data lifecycle management, reporting automation
- **Reliability & Operations:** Production troubleshooting, root-cause analysis, monitoring, platform health, incident support, capacity support
- **Delivery:** Stakeholder collaboration, technical documentation, cross-team operational support, regulated government environments

Experience

NCS Pte Ltd

Sep 2022 - Present

Cybersecurity / Splunk Engineer (Seconded to DSTA client site)

Singapore

- Seconded to DSTA as an NCS client resource; rotated across Cybersecurity and Infrastructure teams while maintaining a consistent Splunk engineering, security logging and platform-operations scope.
- Govern Splunk Enterprise logging and platform operations for multiple government project teams, supporting platform stability, security visibility and audit readiness.
- Implemented 6 security logging use cases and standardised dashboards and reports to strengthen operational visibility and support security reviews and compliance audits.
- Deliver end-to-end log onboarding and lifecycle management aligned to ingestion, retention, search and reporting requirements.
- Collaborate with stakeholders to define logging requirements and troubleshoot ingestion, search and platform issues using log evidence and infrastructure context.
- Automate recurring compliance checks and data-management tasks using Python and Bash, reducing manual operational effort and turnaround time.
- Maintain Splunk components and underlying RHEL servers through patching, vulnerability assessment and remediation, and system hardening.

NCS Pte Ltd

Nov 2018 - Aug 2022

Wintel Engineer

Singapore

- Administered Windows Server, Hyper-V and Nutanix environments to meet enterprise availability, security and performance requirements.
- Executed patching and vulnerability-remediation programmes and supported disaster-recovery planning and testing to strengthen infrastructure resilience.
- Monitored server health, diagnosed infrastructure issues and delivered capacity upgrades to support evolving project demands.

ST Electronics (Info-comm Systems) Pte Ltd

May 2016 - Oct 2018

Systems Engineer

Singapore

- Delivered L1/L2 infrastructure and network support across server administration, patching, monitoring and operational reporting.
- Performed troubleshooting and root-cause analysis across hardware, software and network/security components to restore service and support stable operations.

Evvotech Pte Ltd

Apr 2015 - Apr 2016

NOC & IT Support Engineer

Singapore

- Network monitoring, incident documentation, and customer infrastructure support.

A-speed Infotech Pte Ltd

Feb 2014 - Apr 2015

IT Engineer

Singapore

- End-user support, server/network maintenance, and security administration.

Certification

Splunk Enterprise Certified Admin

Education

University of Portsmouth

Bachelor's Degree, Computer Science / Information Technology (Cybersecurity & Forensics Computing)

• **Achievements:** Second Class Honours (Upper Division)

MAD School (previously Chats Worth Mediation Academy)

Diploma, Mass Communications (Communications & Design)

Additional Training

Data Science Course - Vertical Institute, Singapore

• Modules: Data Analytics with Python; Data Science with Python; Machine Learning
