

GABRIEL WU

SPLUNK / SIEM ENGINEER | PLATFORM OPERATIONS & AUTOMATION

Singapore | [Email](#) | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Splunk / SIEM engineer with 15+ years in enterprise IT operations and hands-on administration of Splunk Enterprise in government environments. Translates security monitoring and audit requirements into data onboarding, SPL dashboards, alerts, scheduled reporting, retention controls, and evidence workflows. Combines RHEL/Windows platform operations with Python, Bash, and PowerShell automation and cross-team delivery.

CORE EXPERTISE

Splunk & SIEM: Splunk Enterprise administration; SPL search optimisation; dashboards, alerts, scheduled reports

Log Engineering: Data onboarding; ingestion troubleshooting; retention; parsing, field extraction, and normalisation coordination

Security Operations: Log analysis; investigation support; audit evidence; compliance reporting; security reviews

Platforms & Automation: RHEL and Windows Server hardening, patching, vulnerability remediation; Python, Bash, and PowerShell

CERTIFICATIONS

- Splunk Enterprise Certified Admin | Splunk | 2026 | Active
- Splunk Core Certified Power User | Splunk | 2025 | Active

PROFESSIONAL EXPERIENCE

Cybersecurity / Splunk Engineer (Seconded to DSTA client site)

NCS Pte Ltd | Singapore | Sep 2022 - Present

- Administer and govern Splunk Enterprise for multiple government project teams, supporting secure and scalable logging and SIEM operations.
- Designed and implemented six security logging use cases, with SPL dashboards and reports supporting monitoring, security reviews, and audit evidence.
- Led end-to-end onboarding of data sources, aligning ingestion, retention, and operational requirements with stakeholder needs.
- Troubleshoot ingestion and search issues across technical teams, improving data quality, search usability, and day-to-day supportability.
- Support security operations and investigations through log analysis, evidence extraction, and compliance reporting.
- Automate recurring compliance checks and data-management tasks with Python, Bash, and PowerShell to reduce manual follow-up.
- Maintain Splunk components and underlying RHEL servers through patching, vulnerability remediation, and system hardening.

Wintel Engineer

NCS Pte Ltd | Singapore | Nov 2018 - Aug 2022

- Managed Windows Server, Hyper-V, and Nutanix environments supporting enterprise availability, security, and performance requirements.
- Executed patching and vulnerability-remediation programmes and supported disaster-recovery planning and testing.
- Monitored platform health, resolved complex infrastructure issues, and delivered upgrades and operational support.

Systems Engineer

ST Electronics (Info-comm Systems) Pte Ltd | Singapore | May 2016 - Oct 2018

- Provided L1/L2 infrastructure and network support, including server administration, patching, monitoring, and operational reporting.
- Performed troubleshooting and root-cause analysis across hardware, software, and network/security components.

EARLIER EXPERIENCE

- NOC & IT Support Engineer | Evvotec Pte Ltd | Apr 2015 - Apr 2016 - Network monitoring, incident documentation, and customer infrastructure support.
- IT Engineer | A-speed Infotech Pte Ltd | Feb 2014 - Apr 2015 - End-user support, server/network maintenance, and security administration.

SELECTED PROJECT

Splunk Utility Tool 4.0 | Python, Tkinter, Splunk Management API | 2026

- Built a public, sanitized Windows desktop utility for controlled Splunk saved-search regeneration with custom and sliced date-range dispatch planning.
- Implemented pre-dispatch review, bounded retry and reconciliation, post-dispatch verification, and tested Plane/Bus execution paths for small and larger workloads.
