Professional Summary

SIEM / Splunk engineer with 15+ years in enterprise IT operations, including hands-on administration of Splunk Enterprise for government environments and on-site delivery at DSTA. Strong experience translating security monitoring and audit requirements into onboarded data sources, dashboards, alerts, scheduled reports, and retention controls. Brings practical strength in SPL-based search and reporting, log onboarding coordination, troubleshooting ingestion and search issues, platform hardening on RHEL/Windows, and cross-team support for security operations, compliance, and incident investigation.

Core Skills

Splunk / SIEM	Splunk Enterprise administration, SIEM use-case implementation, dashboards, alerts, scheduled reports, search optimisation
Log Engineering	Data onboarding, source integration, log ingestion, retention management, parsing and field extraction coordination, normalisation support
Security Operations	Threat detection support, log analysis, incident investigation support, security reviews, audit evidence preparation, compliance reporting
Infrastructure	Red Hat Enterprise Linux (RHEL), Windows Server, system hardening, patching, vulnerability remediation
Automation	Python, Bash, PowerShell, recurring compliance checks, data management task automation, report generation
Delivery	Stakeholder collaboration, troubleshooting, documentation, cross-team coordination, operational support

Experience

Cybersecurity / Splunk Engineer (Seconded to DSTA client site) NCS Pte Ltd Singapore	Sep 2022 - Present
- Seconded on-site to DSTA as an NCS client resource; rotated across two departments while maintaining a consistent Splunk engineering and security logging scope (titles: Cybersecurity Engineer, Sep 2022 - May 2024; Infrastructure Engineer, Jun 2024 - Present). - Administer and govern the Splunk Enterprise environment for multiple government project teams, supporting secure, scalable logging and SIEM operations. - Designed and implemented six security logging use cases, with SPL-based dashboards and reports used for security reviews, monitoring, and audit support. - Led end-to-end onboarding of data sources into Splunk, aligning log ingestion, retention, and operational requirements with stakeholder needs. - Worked with stakeholders and technical teams to define logging requirements, troubleshoot ingestion and search issues, and improve data quality and usability. - Supported security operations and investigations through log analysis, evidence extraction, and reporting for compliance and review activities. - Automated recurring compliance checks and data management tasks using Python, Bash, and PowerShell, reducing manual effort and improving turnaround time. - Maintained Splunk components and underlying RHEL servers through patching, vulnerability remediation, and system hardening.	
Wintel Engineer NCS Pte Ltd Singapore	Nov 2018 - Aug 2022
- Managed Windows Server, Hyper-V, and Nutanix environments supporting availability, security, and performance requirements in enterprise environments. - Executed patching and vulnerability remediation programmes, and supported disaster recovery planning and testing for resilient operations.	

- Monitored platform health, troubleshoot complex issues, and delivered upgrades and operational support across server infrastructure.
